Dear Mr. J. J. Jimson,

I found your posting on Indeed that there is an available position as a design artist for your animation studio. I believe, with my skills and experience in the field, I would be a great addition to your studio. I have spent the last 2 years developing my skills and studying the Principles of Animation at the Center for Technology, and am fully equipped with the knowledge and skills to become your next design artist.

During my time at the Center for Technology, I dove into the intricacies of Computer Animation by applying the basic principles of animation into practice inside of my program. We learned the fundamentals of squash and stretch, drag, animating on 1s and 2s, anticipation, and overlapping action.

I was able to participate in the Vermont Highway Safety PSA Contest, with my submission being an animated short showcasing the importance of highway safety. This project allowed me to perform my skills and utilize my learning in a professional environment by creating a project intended to be viewed by the public.

I would be honored to be granted the opportunity to work with you and the other members of your studio. Attached is my resume, as well as my portfolio website showcasing the work I have accomplished.

I look forward to hearing from you and would like to arrange an interview at your convenience.

My mobile number is 802.871.0648

Best,

Jeremiah Batres
